INT-CL (IPC): A61K 0/00

ABSTRACTED-PUB-NO: ZA 9104494A

BASIC-ABSTRACT:

Anthelmintic compsn. comprises resorantel (I) and a benzimidazole (II) or a
tetrahydropyrimidine (III).

More specifically, (II) is fenbendazole, albendazole, oxfendazole or mebendazole.
(III) is pyrantel pamoate, morantel tartrate or pyrantel tartrate.

USE/ADVANTAGE - The compsn. is effective against both tapeworms and roundworms in a
single dose, thus treatment of animals over a period of days is not required. The
compsn. is esp. suited to treatment of small animals, such as cats and dogs, but it
may also be used for cattle and horses. (Reissue of the entry advised in week 9222
based on complete specification)
